The Welding Journal

Index to Volume 25—1946

Published by the American Welding Society, 33 West 39th Street, New York 18, N. Y.

Part I—The Welding Journal

This part includes general technical articles, papers presented before Section and National meetings, news, biographical items, current welding literature and advertising.

Page Allocation by Issues

January.....	1–100	July.....	595– 694
February.....	101–196	August.....	695– 794
March.....	197–294	September...	795– 906
April.....	295–394	October.....	907–1038
May.....	395–490	November...	1039–1170
June.....	491–594	December ...	1171–1266

Part II—Welding Research Supplement

This section includes the reports of the Welding Research Council, critical digests of the literature, reports of the Project Committees and research reports of industry.

Page Allocation by Issues

January....	1-s– 64-s	July.....	361-s–424-s
February...	65-s–128-s	August.....	425-s–488-s
March.....	129-s–192-s	September..	489-s–584-s
April.....	193-s–256-s	October....	585-s–728-s
May.....	257-s–320-s	November..	729-s–808-s
June.....	321-s–360-s	December ..	809-s–856-s

PART I—THE WELDING JOURNAL

SUBJECT INDEX

Aircraft Brazed Joints, Controlling Strength of—C. Rhyne, 599–611.
Aircraft Engines and Accessories, Stainless Steel Resistance Welding on—F. G. Harkins and W. L. Hales, 39–46.
Aircraft Gas Turbine Jet Engine Welded—J. G. Shaw, 529–530.
Aircraft Jet Engines, Resistance Welded—F. G. Hawkins, 1175–1178.
Alloy Steels, High Strength—H. Miller, 1077–1079.
Alternating and Direct Current Welding—L. Cline, 51–52.
Aluminum Alloy Tank Cars Welded—A. H. Woollen, 129–130.
Aluminum Alloys Brazed by Gas Flame—F. Clark, 505–513.
Arc Starting Characteristics of D. C. Welders with Reference to Electrode Freezing—J. M. Tyrner, 437–439.
Arc Welders, Limited Input—E. Steinert, 844–847.
Arc-Welding Machine and Electrode Standards—NEMA, 317–318.
Atomic Bomb Development Was Hastened by Welding—A. F. Davis, 118–119.
Atomic Hydrogen Welding in Aviation—F. S. Dever, 309–312.

Brazed Aircraft Joints, Controlling Strength of—C. Rhyne, 599–611.
Brazed Joints in Aircraft Structures, Design and Production Control of Silver Alloy—H. A. Smith and P. A. Koerner, 1061–1067.
Brazing of Aluminum, Aluminum Alloy Sheet and Subassemblies by Gas Flame—F. Clark, 505–513.
Bridge, Welded Pier Leg, Shear Leg and Trolley of a 15-Ton Ore—G. F. Wolfe, 921–927.

Castings, Gray Iron, Procedures for Arc Welding—C. E. Phillips, 547–548.
Chromium-Molybdenum Steel, Electrodes for—D. L. Mathias and J. M. Leigh, 399–405.
Codes for Arc and Gas Welding in Building Construction—L. M. Dalcher, 829–832.
Costs, Efficient Arc Welding by Means of Proper Procedures—W. J. Conley, 131–141.
Costs—Proportioning of Weld Sizes—C. M. Leavitt, 121–129.
Cracking, Weld, How to Overcome—L. K. Stringham, 440–448.
Crane, Portable Converted to Welded—F. W. Kessler, 242–245.
Cutting Applications, Special Oxyacetylene Machine—R. F. Helmkamp, 213–222.
Cutting, Flame Hardening and Welding on Railroads—J. W. Kenefic, 299–307.
Cutting, Flame, in the Steel Warehouse—L. J. Quetsch, 24–25.
Cutting, Flame-Operating Data—A. F. Chouinard, 1186–1188.
Cutting Small Circles, A Guide for—H. P. Martin, 339–340.

Defects in Welding, Causes and Prevention—F. S. Dever, 860–864.
Design and Fabrication of Welded Steel Reduction Gear Drives—G. L. Snyder, 699–703.
Design Consideration for Welded Machinery Parts—G. L. Snyder, 105–118.
Design, Conversion of Portable Crane to Welded Design—F. W. Kessler, 242–245.
Design of Welded Saw Band—J. J. Morrill, 543–545.
Design-Proportioning of Weld Sizes—C. M. Leavitt, 121–129.
Design Welded Crosshead—J. R. Morrill, 448–449.
Drydocks, Floating, Welded Design and Fabrication—A. Amirikian, 929–935.

Economics of Arc Welding, Discussion—C. M. Underwood, W. J. Conley and C. H. Jennings, 130.
Electrode Group E601X—O. T. Barnett, 962–964.
Electrode Standards—NEMA, 317–318.
Electrodes for Welding Chromium-Molybdenum Steel—D. L. Mathias and G. M. Leigh, 399–405.
Engineers, A National Spokesman for—A. B. Stickney, 342–343.
Expansion and Contraction—R. B. Aitchison, 1195–1202.

Flame Cutting, Flame Hardening and Welding on Railroads—J. W. Kenefic, 299–307.
Flame Cutting in the Steel Warehouse—L. J. Quetsch, 24–25.
Flame Cutting, Operating Data—A. F. Chouinard, 1186–1188.
Flame Hardening, Cutting and Welding on Railroads—J. W. Kenefic, 299–307.
Flame-Hardening in the Small Shop—W. B. Sharav, 19–24.
Flame-Hardening of Valve Plugs—R. H. Brooks, 245–246.
Flame-Hardening Setup for Small Machined Parts—W. B. Sharav, 328.
Flash Welding Alloy Steel Rings—P. B. Scharf, 313–317.
Forgings, Welding of 3½% Ni-0.40% Carbon Class An Steel—Bela Ronay, 495–503.

Gas Cutting—Electric Eye Tracing in Machine Cutting—C. M. Underwood and E. D. Debes, 58.
Gas Turbine Rotors, Welded—J. F. Cunningham, 237–241.

Hard Facing Alloys, Microstructure of—H. W. Sharp, 936–941.
Hard Facing by the "Spray Weld" and "Powder-Weld" Process—C. J. Long and T. E. Rich, 744–745.
Hard Surfacing Electrodes for Wear-Resisting—J. A. Cunningham, 915–920.
Hastelloy Alloys, Welding and Other Fabrication Methods for—C. G. Chisholm, 1179–1183.

Heliarc Welding in Aircraft Industry—F. R. Shanley and C. T. Fallon, 32.
House—Steel Construction—A. Fetz, 733–737.

Inspection Handbook for Manual Metal-Arc Welding, 410–436.
Inspection of Welded Construction—A. E. Poole, 341–342.

Job Shop—Starting Your Own—H. Ullmer, 406–407.

Locomotive Boilers, Welded Construction—J. Partington, 1183–1185.

Machinery Parts, Design Considerations for Welded—G. L. Snyder, 105–118.
Machinery—Welded Redesign Brings Marked Improvements to Electric Meat Saw Machine—J. J. McKeighan, 53–56.
Machinery—Welding a 500 Hp. Diesel Engine—L. Berner, 319–327.
Machinery—Welding of Electric Apparatus—E. F. Potter, 942–945.
Magnesium Welding—L. F. Pearsall, 549.
Melting Points of Metals and Alloys—H. R. Morrison, 545–546.

NEMA Arc Welding Machine & Electrode Standards, 317–318.
Nickel (3½%)–0.40% Carbon Class An Steel Forgings, Welding of—Bela Ronay, 495–503.
Nondestructive Testing of Pressure Vessels, Radiographic and Sonic—O. R. Carpenter, 531–542.
Nonferrous Metals, Soft-Soldering—G. H. Bohn, 513–516.

Operator Certification for Work on Navy Contracts—V. M. Alexieff, 344–345.
Ordnance Equipment, Welded Design as Applied to Lightweight Army and Navy Structures—H. A. Oldenkamp, 33–37.
Oxygen Cutting, Recent Canadian Contributions—R. A. Dunn, 946–952.

Pipe Lines, Maintenance and Repair of, Discussion—A. N. Kugler, H. C. Price and P. M. Mattern, 46–47.
Pipe Lines, Pressure Welded—E. P. Jones, 27–31.
Plastic Flow of Metals—W. P. Roop, 799–823.
Poke Welding of Stainless Steel Cold Storage Sheathing—R. K. Waldvogel, 738–744.
Power for Welding, Discussions on—C. M. Rhoades, Jr., W. Woodward and R. E. Young, 47–49.
Pressure Vessels Welded for the Oil Industry—J. C. Holmberg, 329–332.
Pressure Welding of Overland Pipe Lines—E. P. Jones, 27–31.
Pressure Welding of Some Low-Alloy Steels and Nonferrous Alloys—K. H. Koopman, 1069–1076.
Pressure Welds, Fundamentals Affecting the Bond in—L. Fine, C. H. Maak and A. R. Ozanich, 517–529.
Procedures, Efficient Arc Welding by Means of Proper—W. J. Conley, 131–141.
Processes Welding, Selection of—W. J. Campbell, 704–706.
Production of Welded Products—E. C. Brekelbaum, 975–979.
Production Welding—A. F. Davis, 1193–1194.
Projection Welding of Fasteners—R. A. Reich, 1189–1192.
Projection Welding Push Rod—E. B. Rhoades, 842–843.

Radiograph Interpretation of Spot Welds in Alclad 24ST and 75ST Aluminum Alloys—R. C. McMaster and F. C. Lindvall, 707–723.
Radiography in the Welding of Pressure Vessels—O. R. Carpenter, 531–542.
Radiography of Spot Welds in Light Alloy and Ferrous Sheet Materials—R. C. McMaster and F. C. Lindvall, 851–860.
Railroad Construction, Modern Steels in—H. M. Priest, 646–649.
Railroad, Construction of 100 All-Welded Cabooses—A. T. Cox, 650–651.
Railroad Cutting, Welding and Flame Hardening—J. W. Kenefic, 299–307.
Railroad Freight Car Construction—R. L. Rex, 1043–1048.
Railroad Locomotive Wheels Rebuilt by Automatic Shielded Arc Methods—L. K. Stringham, 336–339.
Railroad Passenger Cars Produced by Resistance Welding—A. M. Unger, 911–914.
Railroads, Application of Welding on—L. E. Grant, 644–645.
Repairing Contractors' and Steel Mill Equipment with Manganese Applicator Bars—L. A. Davis, 969–974.
Resistance Poke Welding of Stainless Steel Cold Storage Sheathing—R. K. Waldvogel, 738–744.
Resistance-Seam-Welded Sacks Used as Hydromatic Presses—R. T. Gillette, 847–850.
Resistance Welding—Additiona Timing Period of New Motor Driven Control Increases Gun Welder Speed—H. I. Stanback, 1055–1060.
Resistance Welding Aids in the Production of Jet Engines—F. G. Harkins, 1175–1178.
Resistance Welding, Design for—I. A. Crawford, 927–928.
Resistance Welding, Discussions of Application of Capacitor Discharge to Welding—F. R. Woodward, T. J. Crawford, A. A. Burr and C. E. Smith, 144–145.
Resistance Welding of 40-MM Ammunition Boxes—F. M. Pence, 824–828.
Resistance Welding of Railroad Passenger Cars—A. M. Unger, 911–914.
Resistance Welding on Stainless Steel Aircraft Engines and Accessories—F. G. Harkins and W. L. Hales, 39–46.
Resistance Welding with Storage Battery Power—J. D. Gordon, 1049–1054.

Saw Band, Changeover to Welded Design—J. R. Morrill, 543–545.
Seam-Welded Sacks Used as Hydraulic Presses—R. T. Gillette, 847–850.
Selection of Welding Processes—W. J. Campbell, 704–706.
Sheet Metal, Fusion Welding of—J. M. Diebold, 724–732.
Ship Failures, Some Improvements Resulting from Studies of Welded—D. B. Bannerman and R. T. Young, 223–236.
Ship Welding Construction, Discussion of—E. M. MacCutcheon, V. Vasta and H. W. Pierce, 49–51.
Ships—The Design and Methods of Construction of Weld Steel Merchant Vessels—Report of Board, 5–18.
Ships—Discussion on Welding of Propulsion Shafting—J. T. Vann, 333–335.
Ships—Proportioning of Weld Sizes—C. M. Leavitt, 121–129.
Ships—Some Problems of Welding Design and Fabrication of Steel Floating Drydocks—A. Amirikian, 929–935.
Soft-Soldering Nonferrous Metals—G. H. Bohn, 513–516.
Soldering Induction Speeds Kitchen Utensil Production—L. Gise and J. R. Steinert, 1210–1211.
Sonic and Radiographic Testing of Pressure Vessels—O. R. Carpenter, 531–542.
Spot Weld Radiography in Light Alloys and Ferrous Sheet Materials—R. C. McMaster and F. C. Lindvall, 851–860.
Spot Welded Lap Joint in 24ST Alclad Aluminum, Development of a Two-Row High-Strength—L. M. Crawford and J. E. Pease, 1203–1210.
Spot Welds—Radiograph Interpretation in Alclad 24ST and 75ST Aluminum Alloys—R. C. McMaster and F. C. Lindvall, 707–723.
Spot Welds, Variation in Quality in Low-Carbon Steel—J. J. Riley, 833–842.
Stainless Steel Aircraft Engines and Accessories, Resistance Welding on—F. G. Harkins and W. L. Hales, 39–46.
Stainless Steel, Discussions on Chemical Factors Affecting the Welding Properties of Stabilized 18–8—V. Whitmer, S. F. Urban and G. F. Comstock, 56–57.
Stainless Steel Poke Welding of Cold Storage Sheathing—R. K. Waldvogel, 738–744.
Stainless Steel Welding—J. B. Arthur, 31–32.
Stainless Steels, Welding of—J. L. Filbert, 642–644.
Steam Platens—H. B. Lewis, 142–143.
Stress and Strain in Plastic Flow—W. P. Roop, 799–823.
Stresses, Welding, Control by Sequence—P. Ffield, 1109–1122.
Structural—Codes for Arc and Gas Welding in Building Construction—L. M. Dalcher, 829–832.
Structural—Some Problems of Welding Design and Fabrication of Steel Floating Drydocks—A. Amirikian, 929–935.
Structural Steel House Construction—A. Fetz, 733–737.
Structures, Recent Trends in Concepts of Design—L. Grover, 1091–1108.
Symbols, Standard Welding—612–641.

Tanks—Discussion Paper on Welded Gas Holders with Panel Type Lifts—G. F. Wolfe, 25–26; R. B. Lincoln, 236.
Tanks—Field Erected Pressure Vessels—F. L. Plummer, 1081–1089.
Tanks—Large Gas Holders at Long Beach Feature All-Welded Construction—H. O. Hill, 745–746.
Tool and Die Welding—A. R. Butler and F. E. Kessler, 953–961.
Tool Tips, Induction Heating Brazing—T. A. Vernon and E. F. Adams, 26.
Trailer Design Welded Features Novel Truck Mounted Front Suspension—A. F. Davis, 737.

Underwater Cutting and Welding—Chas. Kandel, 209–212.
Underwater Cutting, U. S. Navy Developments in—Bela Ronay and C. D. Jensen, 201–209.

E. Engin.
Fallon

Welding Research Council

PART II—WELDING RESEARCH SUPPLEMENT

SUBJECT INDEX

Aircraft Tubing Weldability—H. R. Lewis, 64; Arthur J. Williamson, 256.
Aluminum Alclad 24ST Efficiency as Affected by Spot Welds—W. F. Hess, R. A. Wyant and F. J. Winsor, 361–375.
Aluminum Alloy Alclad 24ST, An Investigation of the Fatigue Strength of Spot Welds in the—W. F. Hess, R. A. Wyant, F. J. Winsor and H. C. Cook, 344–358.
Aluminum Alloys, Electric Furnace Brazing of by—W. F. Hess and E. F. Nippes, Jr., 193–200.
Aluminum Alloys, A New Development in Gas Welding—307–310.
Aluminum Alloy Sheet, Surface Preparation for Spot Welding of—R. A. Wyant, D. J. Ashcraft, T. B. Cameron and K. H. Moore, 65–76.
Aluminum Alloy Sheet, Tension Tests of Single-Row Spot Welds, R. Della-Vedowa, 115–122; Discussion by A. R. Hard, 339.
Aluminum Alloys, Some Observation of Spot Weld Consistency in, W. F. Hess, R. A. Wyant, B. L. Averbach and F. J. Winsor, 201–222.
Aluminum Alloys, Weldability of High Strength Wrought, W. R. Apblett, 802–808.
Aluminum Brazing, Metal and Fillet Formation in—M. A. Miller, 102–114.
Aluminum—Flash Welding of Alclad 24ST Alloy in the 0.064 In. Thickness—W. F. Hess and F. J. Winsor, 9–20.
Aluminum, Spot Welding Alclad 24ST 0.020 In. in Thickness—An Investigation of Current Wave Form—W. F. Hess, R. A. Wyant and B. L. Averbach, 20–29.
Aluminum Spot Welding, Alclad 24ST, An Investigation of Electrode Pressure Cycles and Current Wave Forms, W. F. Hess, R. A. Wyant, B. L. Averbach and F. J. Winsor, 148–162.
Arc Atmospheres and Underbead Cracking—M. W. Mallett and P. J. Rieppel, 748–759.
Arc Atmospheres, Welding, Water Reaction to—M. W. Mallett 396–399.
Arc-Weld Deposits, Constitution of Mild-Steel—H. A. Sloman, T. E. Rooney and T. H. Schofield, 39–52.
Austenitic Electrodes in Welding of Hardenable Steels—S. A. Herres and A. M. Turkalo, 669–696.

Brazed Joints, Copper, Mechanical Properties and Some Metallurgical Features of—R. F. Tylecote, 242–249.
Brazed Joints, Impact Shear Strength of Silver Alloy—H. A. Smith and P. A. Koerner, 188–192.
Brazing Aluminum, Metal and Fillet Formation in—M. A. Miller, 102–114.
Brazing of Structural Aluminum Alloys, Electric Furnace by—W. F. Hess and E. F. Nippes, Jr., 193–200.
Bridges Railroad—Shortening of Eyebars to Equalize the Stress—849–856.
Bridge Welded, Investigation of Failures in—H. Busch and W. Reuleke, 463–466.

Contact Arc Welding—P. C. van der Willigen, 313–320.
Cooling and Heating Rates of Plates, Cylinders and Spheres—V. Paschkis, 497–502.
Copper—Bearing Steels, Weldability of—N. H. Keyser and C. Lorig, 597–611.
Copper Brazed Joints, Mechanical Properties and Some Metallurgical Features of—R. F. Tylecote, 242–249.
Corrosion Resistance of Aluminum Welds in Nitric Acid—R. B. Khmel'Nitskaya, 162.
Cracking Hot, Control of Weld in Nickel-Chromium Iron Alloys—T. E. Kihlgren and C. E. Lacy, 769–775.
Cracking, Underbead and Arc Atmospheres—M. W. Mallett and P. J. Rieppel, 744–759.
Crystal Strength—R. D. Conrad, 450.

Dissimilar Metals—Spot Welding Sheet Aluminum to S.A.E. 4140 Steel—W. F. Hess and E. F. Nippes, Jr., 129–148.

Electrodes—Effect of Alloying Elements on the Tensile Properties of 25–20 Weld Metal—H. C. Campbell and R. D. Thomas, Jr., 760–768.

Fatigue Behavior in Reverse Binding of Welded Sheet Steel—R. L'Hermite and D. Seferian, 512–517.
Fatigue of Notched Specimens with Residual Compression—J. T. Norton, D. Rosenthal and S. B. Maloof, 729–735.
Fatigue—Shortening of Eyebars to Equalize the Stress—849–856.
Fatigue Strength of Carbon Steel Plate as Affected by Metallurgical Changes Due to Welding—425–450.
Fatigue Strength of Spot Welds in the Aluminum Alloy Alclad 24ST—W. F. Hess, R. A. Wyant, F. J. Winsor and H. C. Cook, 344–358.
Fatigue Strength of Welded Joints as Affected by Periods of Rest—518–521.
Ferritic Electrodes in Welding of High-Strength Constructional Steels—S. A. Herres and P. E. Woodward, 646–658.
Flash Welding of Alclad 24ST Alloy in the 0.064 In. Thickness—W. F. Hess and F. J. Winsor, 9–20.
Flash Welding of Hard-Drawn High-Carbon Steel Wire—R. W. Bennett and R. D. Williams, 658–668.
Fracture of Metals—J. H. Hollomon, 534–583.

Graphitization of Carbon-Molybdenum Steel in High-Temperature Steam Piping—G. A. Timmons, 1–8.
Graphitization of High Aluminum Deoxidized Carbon-Molybdenum Steel—Influence of Heat Treatment Upon the Susceptibility to—F. Eberle, 307–312.
Graphitization of Piping, Summary Report on the Joint E.E.I.-A.E.I.C. Investigation of Piping—S. L. Hoyt, R. D. Williams and A. M. Hall, 332–339.
Graphitization, in Some Cast Steels—A. J. Smith, John Urban and J. W. Bolton, 257–268.
Graphitization in Steel, Austenitic Welding for Control of—I. A. Rohrig, 90–101.

Metallurgical Changes Due to Welding Upon the Fatigue Strength of Carbon Steel Plates—425–450.

Nondestructive Measurement of Residual and Enforced Stresses by Means of X-ray Diffraction—George Sachs, C. S. Smith, J. D. Lubahn, G. E. Davis and L. J. Ebert, 400–412.
Notch Impact Resistance of Gas-Welded, Improvement of—A. Matting and H. Koch, 359–360.
Notched-Bead Slow-Bend Test for Weldability of Steels—C. B. Voldrich, R. W. Bennett and D. C. Martin, 77–90.

Peening Effect Upon Residual Welding Stresses—E. P. DeGarmo, Finn Jonassen and J. L. Merian, 616–623.
Phase Microscope—584.
Piping, Graphitization of Carbon-Molybdenum Steel in High-Temperature Steam Piping—G. A.Timmons, 1–8.
Piping, Graphitization, Summary Report on the Joint E.E.I.-A.E.I.C. Investigation of—S. L. Hoyt, R. D. Williams and A. M. Hall, 332–339.
Pressure Gas Welding of Alloy Steel Tubing—J. L. Zambrow and R. D. Williams, 585–596.

Railroad Eyebars Shortening to Equalize the Stress—849–856.
Research Problems—250–256.
Research, Welding, in the South—W. W. Austin, Jr., and E. N. Kemler, 630–633.
Residual and Enforced Stress Measurement by Means of X-ray Diffraction—George Sachs, C. S. Smith, J. D. Lubahn, G. E. Davis and L. J. Ebert, 400–412.
Residual Strain, Variation of Longitudinal Through the Thickness of a 1-In. Unionmelt Weld—J. L. Meriam, Finn Jonassen and E. P. DeGarmo, 844–847.
Residual Stresses in Intersecting Butt Welds—E. P. DeGarmo, J. L. Meriam and Finn Jonassen, 451–463.
Residual Stresses of Unrestrained Butt Welds as Affected by Length—E. P. DeGarmo, J. L. Meriam and Finn Jonassen, 485–487.
Residual Stresses in Weldments or Steel Castings as Affected by Temperature Gradients—J. R. Stitt, 487–488.
Residual Welding Stresses, Effect of Certain Block and Other Special Welding Procedures—F. Jonassen, J. L. Meriam and E. P. DeGarmo, 492–496.
Residual Welding Stresses, Effect of Peening Upon—E. P. DeGarmo, Finn Jonassen and J. L. Meriam, 616–623.
Residual Welding Stresses, A Method for the Measurement of—J. L. Meriam, E. P. DeGarmo and Finn Jonassen, 340–343.
Residual Welding Stress Redistribution by Tensile Loading—J. L. Meriam, E. P. DeGarmo and Finn Jonassen, 697–699.
Residual Welding Stress Reduction by the Use of Austenitic Electrode—F. Jonassen, J. L. Meriam and E. P. DeGarmo, 489–491.

Ship Hatch Corners, Model Tests of Weld Reinforcements—G. L. Smith, 163–170.
Ship Steels, An Investigation of the Phenomenon of Cleavage Type Fractures in Low Alloy—H. J. Gershenow and G. G. Luther, 611–615; Discussion W. B. Brooks, 847–848.
Ship Stresses—Structural Investigation in Still Water of the Welded Tanker *Neverita*—F. B. Bull, R. B. Shepheard and James Turnbull, 809–843.
Ships Welded, Model Tests of Weld Reinforcements for the Hatch Corners of—G. L. Smith, 257–267.
Spot Weld Consistency in Aluminum Alloys—W. F. Hess, R. A. Wyant, B. L. Averbach and F. J. Winsor, 201–222.
Spot Weld Effect on the Sheet Efficiency of Alclad 24ST—W. F. Hess, R. A. Wyant and F. J. Winsor, 361–375.
Spot—Welded Joints in 24ST Alclad Aluminum Alloy Sheet, Tension Tests of Single-Row—R. Della-Vedowa, 115–122; Discussion by A. R. Hard, 339.
Spot Welding Alclad 24ST, An Investigation of Electrode Pressure—Cycles and Current Wave Forms—W. F. Hess, R. A. Wyant, B. L. Averbach and F. J. Winsor, 148–162.
Spot Welding Alclad 24ST 0.020 In. in Thickness—An Investigation of Current Wave-Form—W. F. Hess, R. A. Wyant and B. L. Averbach, 20–29.
Spot Welding of High-Tensile Carbon and Low-Alloy Steels—W. F. Hess, W. D. Doty and W. J. Childs, 503–512.
Spot Welding of High-Tensile Carbon and Low-Alloy Steels—W. D. Doty and W. J. Childs, 624–630.
Spot Welding, An Investigation of the Effect of Spot Welding on the Sheet Efficiency of Aluminum Alloy 24ST—W. F. Hess, R. A. Wyant and F. J. Winsor, 288–306.
Spot Welding of Multiple Thicknesses of 0.040-In. Alclad 24ST—W. F. Hess, R. A. Wyant and F. J. Winsor, 413–424.
Spot Welding Schedules for Low-Carbon Steel—J. Heuschkel, 700–728.
Spot Welding Sheet Aluminum to S.A.E. 4140 Steel—W. F. Hess and E. F. Nippes, Jr., 129–148.
Spot Welding, Surface Preparation of Aluminum Alloy Sheet—R. A. Wyant, D. J. Ashcraft, T. B. Cameron and K. H. Moore, 65–76.
Spot Welding of Ten Aluminum Alloys in the 0.040-In. Gage—W. F. Hess, R. A. Wyant and F. J. Winsor, 467–484.
Spot Welding of NE 8715, NE 8630 and SAE 4340 in the 0.062-In. Thickness—W. F. Hess, W. D. Doty and W. J. Childs, 123–128.
Spot Welds in the Aluminum Alloy Alclad 24ST, Fatigue Strength of—W. F. Hess, R. A. Wyant, F. J. Winsor and H. C. Cook, 344–358.
Stainless 25–20 Weld Metal Effect of Alloying Elements on the Tensile Properties—H. C. Campbell and R. D. Thomas, Jr., 760–768.
Straining of Deposited Weld Metal During Cooling—D. Rosenthal, 76.
Stress-Corrosion Cracking of Mild Steel, Relation of Strain Aging to—J. T. Waber and H. J. McDonald, 223–234.
Stress Corrosion Cracking, Discussion—G. F. Comstock, 699.
Stress Relief of Weldments of Machining Stability: Part II—J. R. Stitt, 30–39.
Stress Relieving, Controlled Low-Temperature—T. W. Greene and A. A. Holzbaur, 171–185.
Stresses—Structural Investigation in Still Water of the Welded Tanker *Neverita*—F. B. Bull, R. B. Shepheard and James Turnbull, 809–843.

Transition Temperature of Navy High-Tensile Low-Alloy Steels as Affected by Welding—G. G. Luther, C. E. Hartbower, R. E. Metius and F. H. Laxar, 634–645.
Triaxiality Effect on the Technical Cohesive Strength of Steels—G. Sachs and J. D. Lubahn, 53–64.

Weldability and Control of the Production of Steel Aircraft Tubing—H. R. Lewis, 64; A. J. Williamson, 256.
Weldability of Copper-Bearing Steels—N. H. Keyser and C. H. Lorig, 597–611.
Weldability—deForest Brittle Temperature Research—P. R. Shepler, 321–332.
Weldability—Effect of Oxygen on Carbon in Steel—Leslie Fine and Charles H. Maak, 283–287.
Weldability, Elusive Character of—W. L. Warner, 185–188.
Weldability of Hardenable Steels with Austenitic Electrodes—S. A. Herres and A. M. Turkalo, 669–696.
Weldability of High-Strength Constructional Steels with Ferritic Electrodes—S. A. Herres and P. E. Woodward, 646–658.
Weldability of High-Strength Wrought Aluminum Alloys—W. R. Apblett, Jr., 802–808.
Weldability, Influence of Geometrical Restraint and Temperature on the Toughness and Mode of Rupture of Structural Steel—A. R. Anderson and A. G. Waggoner, 789–801.
Weldability—Influence of the Melting Technique and Heat Treatment or Cracking and Resistance of Welded Sheet Steel Containing about 1% Mn—W. Eilender, H. Arend and I. Mircea, 531–533.
Weldability—An Investigation of the Effect of Welding on the Transition Temperature of Navy High-Tensile Low-Alloy Steels—G. G. Luther, C. E. Hartbower, R. E. Metius and F. H. Laxar, 634–645.
Weldability of Low-Alloy Ship Steels, An Investigation of the Phenomenon of Cleavage Type Fractures—H. J. Gershenow and G. G. Luther, 611–615; Discussion, W. B. Brooks, 847–848.
Weldability—A Method for Determining the Applicable Welding Procedure for Steels—B. Ronay, 736–747.
Weldability—Quantitative Measurement of the Cracking Tendency in Welds—R. D. Stout, S. S. Tör, L. J. McGeady and G. E. Doan, 522–531.
Weldability of Ship Steels—E. F. Nippes, Jr., and W. F. Savage, 776–787.
Weldability of Steels, Notched-Bead Slow-Bend Test for—C. B. Voldrich, R. W. Bennett and D. C. Martin, 77–90.
Weldability Testing Summary of Carbon and Low-Alloy Steels—G. G. Luther, Clarence E. Jackson and C. E. Hartbower, 376–396.
Weldability—The Use of Direct Transformation Data in Determining Preheat and Postheat Requirements for Arc Welding Deep Hardening Steels and Weld Deposits—L. F. Bowne, Jr., 234–241.
Weld Stress Problem—Critical Review of the—J. T. Norton and D. Rosenthal, 277–282.

X-Ray Diffraction Camera Heat Treatment—General Rules for Quenching, Tempering and Austempering—584.
X-Ray Diffraction Study of the Effect of Residual Compression on the Fatigue of Notched Specimens—J. T. Norton, D. Rosenthal and S. B. Maloof, 729–735.
X-Ray Diffraction Study of Notch-Bend Test—J. T. Norton, D. Rosenthal and S. B. Maloof, 269–276.
